**GE Healthcare Imaging Subsystems Wins Two Wisconsin  
Manufacturer of the Year Awards**  
**Milwaukee Company Wins in Mega and Sustainability Categories**

**Milwaukee** – GE Healthcare Imaging Subsystems won two 2010 Wisconsin Manufacturer of the Year awards at a black tie banquet Thursday night at The Pfister Hotel in Milwaukee. They are one of only seven Wisconsin companies who won this year’s prestigious awards, competing against 53 total nominees. They won in the Mega company size category, for companies with 751 or more employees, and in the Sustainability category, honoring companies for their efforts in environmental sustainability.

GE Healthcare Imaging Subsystems effectively uses science and technology to advance their industry. They foster a company culture of continuous improvement, and have successfully implemented and maintained a Lean environment. They measure and effectively track their sustainability efforts and impact. They are a leading, financially stable company, and champion overall operational excellence in everything they do. GE Healthcare is committed to maintaining a healthy bottom line which contributes to a committed workforce, a strong community, and a sustainable future.

GE Healthcare Imaging Subsystems’ Electric Avenue location focuses its manufacturing and design operations on complex, process sensitive products that are key for CT and XR system performance, and is the largest of GE’s Imaging Subsystems locations, with 550 employees. In order to maintain and improve the highly sensitive manufacturing processes required for these products, the engineering, operations, and advanced manufacturing engineering teams are highly integrated.

GE operates an environmentally conscious site. Their “ecoTube” program will use parts recovered from returned tubes, resulting in a much lower usage and disposal of exotic metals. The hallmark of this site has been an extremely strong culture of teamwork and continuous improvement, leveraging both Lean Manufacturing and Six Sigma methodologies. Team members at every level of the organization are fully engaged in this drive for excellence.
